### **Mechanical Control**

### **Touch Control**

## **Trouble Shooting**

If any problem occurs, please detach the plug from the socket and contact the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

Problem	Cause	Solution
Light on, but motor does not work	The outlet valve is blocked	Detach flue and duct then turn on the hood to check if the valve opens
	The capacitor has failed	Call for technical service
	The control switch has failed	Call for technical service
Light does not work, motor does not work	No power supply	Plug another appliance into the socket to confirm there is power supply
	Fuse has blown	Open up the plug and replace the 13A fuse
Vibration	The propeller is damaged or unbalanced	Call for technical service
	The hood is not installed correctly	Review the installation instructions & check the installation again for loose screws, brackets or connections
Insufficient suction effect	The distance between the hood and the cooker is too far	Check that the distance is between 650mm to 700mm
	The filters are saturated	Clean the filters from grease residue and replace after drying.

## **Features**

**2.1** This appliance is manufactured from top quality materials, and offers superb streamlined effects.

**2.2** With high suction power and low noise, it is designed to remove cooking fumes from your kitchen quietly & effectively.

## **Installation**

3.1 The reference height from the cooker table to the bottom of the range hood is 650-750mm.

3.2 Above the cooker make three or four holes on the wall with the diameter of 8 mm and the distance between adjacent two holes is about 92.5mm (SEE INSTALLATION SKETCH).

3.3 Push the expand pipes into the holes on the wall until on the same surface with the wall.

3.4 Fix the hook on the wall with bolts.

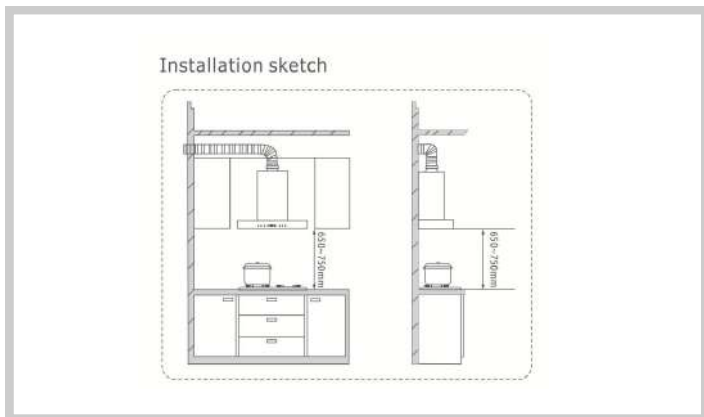

3.5 Connect the outlet pipe with the outlet cover with screws.

3.6 Put the washer on the outlet of the machine, and fix the outlet cover on the outlet of the machine with screws.

3.7 Hang the machine on the hook steadily.

3.8 Cover the outlet pipe with the stainless steel decoration hood, fix the down part of the decoration hood on the machine with screws.

3.9 Adjust the height with the upper part and fix with two screws. Extend the outlet pipe out of the room with reasonable length (the extended length should be less than 2 meters).

**3.7** Ensure that the wall to be installed on is sufficiently sturdy to carry the weight of the hood. It should be mounted level for best performance (see illustration).

**3.8** Do not connect to a common vent with other appliance such as gas heater, water heater, laundry dryer etc.

**3.9** The duct should not be bent more than 120 °C from the one way valve outlet to the kitchen vent.

**3.10** Check to make sure that the electric chord is not in contact with sharp edges of the appliance.

**3.11** Be sure that the plug is accessible after installation.

## **Safety Information**

- ◆ There must permanent & adequate ventilation of the room when operating the range hood with appliances burning gas or other fuels.
