KITCHEN APPLIANCES

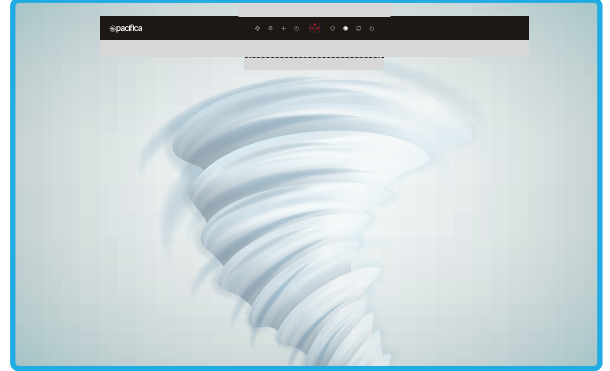

Make cleaning easy with AutoClean™

Pacifica understands that having the right appliances for your kitchen not only makes cooking enjoyable, it also helps make cleaning up after a breeze. That is why we developed the revolutionary AutoClean™ system. The first of its kind in the market, Pacifica's innovative AutoClean™ cooker hoods offer you the convenience of cleaning at the mere touch of a button. So easy and so effortless, it entirely eliminates the need for cleaning and reinstalling messy filters altogether. Revolutionise your kitchen and simplify your life with AutoClean™ today.

Multi-Angle Rotary Jet Technology

High-pressure water jets spray cleaning fluid directly into the motor turbine from multiple directions, resulting in large clean zones and no missed angles.

Superb 360° Suction Power

Equipped with a motor turbine that powerfully draws in grease, smoke and vapour with less resistance so your home stays clean and odour-free.

Baffle Filter

Highly durable, baffle filters made from multiple curved stainless steel panels catch moisture, oil and grease particles. The captured residue then drips into grease collection cups behind the hood for easy cleaning and maintenance.

Stainless Steel Collection Cups

Extra large stainless steel cups that contain more oil are equipped with a viewing window for easy checking of residual oil level so you'll know when cleaning is necessary.

Digital Touch Panel

A clean, simple design that is easy to operate. It also comes equipped with a handy delay timer and one-touch AutoClean™ function.

Dual LED Light

Bright and energy-saving LED lights provide illumination in your cooking zone and give a warm and cosy ambience to complete your kitchen.

Negative ION Function

Remove formaldehyde, soot and odour with the Negative ION purification function that works to improve the quality of air in your kitchen and protect your family's health.

Specially designed for Asian cooking that results in a considerable amount of grease, steam and oily fumes, it efficiently and effectively cleans all internal parts of the cooker hood, leaving you with a clean and grease-free cooker hood motor. A reservoir stores cleaning fluid – tap water and dishwashing detergent – for AutoClean™. When activated, a high-speed jet spray blasts the cleaning fluid directly into the motor turbine of your Pacifica cooker hood. The resultant waste then flows into stainless steel collection cups strategically located at the base of the hood for easy disposal.

Wide-Range Smoke Control Technology

Well-designed with superb precision, the smoke cavity is thoughtfully fitted with a 90cm-wide smoke chamber, as well as suction panels angled at 30° for better smoke control and less wind resistance.

VS

Traditional Cooker Hood

Traditional use of direct suction and straight-up airflow in regular cooker hoods. Smoke and grease are sucked upwards toward the smoke cavity.

AutoClean™ Cooker Hood

A wider and deeper suction area creates negative pressure zones that direct smoke, odour and vapour toward the centre, reducing the escape of unwanted air.

AC7 Mars

90cm T-Shape European Design

Extraction Power : 1,450m³/h
Colour : Stainless Steel
System Type : Ventilation

- Sleek, modern touch panel
- Bigger air chamber for better extraction

The Asian cooking professional

Since its inception in 1993, Pacifica's unique triple-layer flame technology – that's both perfectly elegant, yet fiercely powerful – is legendary in the Asian cooking domain. These hobs come designed with high-heat-resistant, solid-brass, double-ring burners that result in a precise and concentrated triple-layer flame. This in turn, provides a powerful yet even heating platform for greater cooking efficiency. In short, they fire up brilliantly to complement the typical Asian technique of stir-frying and deep-frying in the kitchen.

Big or small, we're all about precision

In our effort to bring you a cooktop that delivers strong and consistent 5kW cooking power to meet your Asian stir-frying needs, we were extremely careful not to overlook the safety of your family.

Somipress 5-Injection Burner

Thanks to five injectors and air taken from the top, the risk of any kind of dirt going inside the appliance is excluded.

Battery Ignition

Fitted with an easy-to-replace battery that offers fast and easy ignition without the bother of any electrical wiring.

Triple-Ring Burners

Featuring simmer control, as well as a powerful wok-style flame for greater cooking versatility befitting all Asian-cooking styles.

Safety Device

If ever the flame is accidentally extinguished for any reason, a built-in thermostat reacts immediately by shutting off the burner's gas supply.

Elegant Knobs

The gas ignites automatically with the push and turn of your wrist, offering you the added convenience of one-handed flame control.

Mirror Reflective Glass

An easy-to-clean glass top with a stylish mirror finish integrates seamlessly with any modern kitchen design.

IGN2 Storm Duo 86cm Built-In Gas Hob

- Powerful and focused fire output
- High quality tempered glass surface
- Aluminium alloy control knobs
- Solid cast iron pan support
- Easy maintenance exterior
- Flame failure safety device
- Flame Rating: 5kW (Left & Right)
- Auto-ignition (battery operated)
- Liquefied Petroleum Gas (LPG) use only

SRP: RM1,557 (W.M.) / RM1,857 (E.M.)

PROMO: RM1,400 (W.M.) / RM1,700 (E.M.)

IGN3 Storm Treo 86cm Built-In Gas Hob

- Powerful and focused fire output
- High quality tempered glass surface
- Aluminium alloy control knobs
- Solid cast iron pan support
- Easy maintenance exterior
- Flame failure safety device
- Flame Rating: 5kW (Left & Right); 2.5kW (Centre)
- Auto-ignition (battery operated)
- Liquefied Petroleum Gas (LPG) use only

SRP: RM1,795 (W.M.) / RM2,095 (E.M.)

PROMO: RM1,615 (W.M.) / RM1,915 (E.M.)

AHN2 Calibre Duo 76cm Built-In Gas Hob

- Somipress 2 burners
- High quality tempered glass surface
- Solid cast iron pan support
- Easy maintenance exterior
- Flame failure safety device
- Flame Rating: 5kW (Left & Right)
- Auto-ignition (battery operated)
- Liquefied Petroleum Gas (LPG) use only

PROMO: RM1,347 (W.M.) / RM1,647 (E.M.)

IVC2i Solaris Duo 70cm Built-In Ceramic Hob

Power Rating : 3,000W
Voltage : 220-240V
Power Level : 15A (without plug head)

- SCHOTT CERAN® glass
- 2 burners with E.G.O. heating element
- Sense touch control
- 9-stage power setting
- 2-digit display
- Child safety lock

SRP: RM1,373 (W.M.) / RM1,673 (E.M.)

PROMO: RM1,236 (W.M.) / RM1,536 (E.M.)

Meet the star of your dream kitchen

The oven is the heart of the kitchen so it really matters which one you choose. Pacifica understands that well so its ProCulinaire kitchen superstar brings you the perfect fusion of form and function. Practical and pleasant to the eye; easy to use and even easier to clean – each oven is engineered to perfection. Complete your home with a Pacifica ProCulinaire oven and make your dream kitchen a reality today.

Large Viewing Window

See what's cooking inside without the need to constantly open the door and let precious heat escape.

Tangential Cooling Fan

Integrally designed to keep the control panel's operating components cool, as well as help reduce temperatures on the oven door and kitchen cabinetry.

Removable Inner Door Glass

A totally flat oven door that is easily removed makes cleaning a breeze. Not only can the door itself be easily removed, but so can the glass.

Catalytic AutoClean™

Eliminate the hassle of scrubbing and cleaning after cooking. Splashes and drips collect on the catalytic liner, which has self-cleaning properties.

Recessed Grill Element

Recessed into the oven ceiling for better energy efficiency and more oven space. This also prevents accidental contact with the heating element.

Quality WipeClean Enamel

Durable and hardwearing enamel interior offers years of reliable service if properly kept and cared for, resulting in an oven that lasts for years to come.

POVS9 Titan 60cm Built-In Oven

- 70-litre capacity
- 9 cooking functions
- Enamel interior and digital control
- Rack support and catalytic panel at side wall
- 5-shelf position
- Triple-glazed full glass door
- Smoke ventilation system
- Large viewing window
- Touch-free inox
- 15 Amp power supply (without plug head)

SRP: RM2,103 (W.M.) / RM2,403 (E.M.)

PROMO: RM1,890 (W.M.) / RM2,190 (E.M.)

A FUNCTION FOR EVERY PURPOSE

Cavity Light

Fully illuminates the interior cavity of the oven.

Delicate Defrost

Circulates room temperature air around food to gently defrost a delicate gateaux or large joint of meat or turkey, whilst protecting it from pests.

ThermoFan 3D

Perfect for all types of baking and roasting, including those involving larger joints. Save time by using up to three levels at one go.

Traditional Grill

Suitable for baking bread and bread-based snacks, like crumpets, muffins, teacakes and Welsh rarebit.

Fan Grill

Ideal for baking poultry weighing up to 2.5kg, and other smaller cuts of meat. Also suitable for crisping up crackling.

Conventional Bake

Ideal for single-shelf baking for a crisper, drier result. Good for meats and fruit pies. Rich fruitcakes will not peak in the centre.

Bottom Heat

For the slow-cooking of stews, curries and casseroles. Also suitable for pizzas, as well as sweet and savoury flans.

Base Heat + Fanned

The base heater and fan operate simultaneously, ensuring even heat distribution. Ideal when additional cooking on the surface of the dish is required.

Fan Assisted Cooking

Together, the fan and the upper and lower heaters provide quick cooking, which is especially ideal for baking batches of food, like biscuits.

Nobody loves your wines more than we do

The Exact Art Of Storing Wines

Of all the storage factors that would adversely affect the ultimate taste, smell, colour, texture and quality of your wine, fluctuating temperature is, by far, the most amazing. Recreate the perfect conditions for storing your wines with Pacifica's all-new range of 2018 ProConnoisseur electric wine cellars that perfectly control the storage environment, so your wines mature as they should.

Trust Our Heritage

Pacifica has built a trusted heritage of producing ultra-modern, easy-to-use wine cellars that have been perfectly tropicalised for Asian conditions, and are able to be used either as free-standing or completely built-in applications. There is definitely a Pacifica wine cellar that is perfect for your needs. Just relax in the knowledge that whichever one you choose, it will last you for years to come.

Packed With Great Features

- Equipped with the latest cooling systems that are non-drying to ensure a good level of in-cabin humidity remains so wine corks stay moist and supple (unlike conventional refrigerators).
- Glide-out, removable shelves made from solid European beechwood are treated with a special resin so they stay fungus-resistant.
- Incorporated with zero-heat emission devices, such as blue LED-powered illumination and electronic controls and display, to prevent uneven hotspots and high temperature pockets.
- Cellar doors swing open beyond a 180° angle for ease of rearrangement of shelves, which makes reorganising your wine collection a cinch.

It is now easier than ever for you to ensure that your wines reach their full potentials.

Mirror-Glass Tinted Glazed Door

The multi-layer smoked glazed doors on ProConnoisseur electric wine cellars are partially mirror-tinted to filter out harmful ultraviolet ("UV") rays because UV light can negatively affect the proper maturation of wines.

Full Electric Control

Incorporating the latest developments in European control panel ergonomics, our wine cellars are designed with ease-of-use and simplicity in mind.

European Beachwood Shelves

Wooden shelves sit comfortably on telescopic rails to grant you convenient access to your stored bottles. Its satin-finish trim gives your wine cellar a smooth and sleek executive look.

Hygrometry In Design

Pacifica's patented technology provides continuous natural aeration that causes condensation to form within the walls of the wine cellar, recreating the ideal environment for wine storage.

Vibration-Free Operation

Specially engineered compressors minimise vibration in Pacifica's line of wine cellars. Our PTW10 and PTW20 utilise Peltier thermoelectric technology, which results in a 100% vibration-free wine cellar.

CAPACITY
160
BOTTLES

ALW160 Michelangelo 160-Bottle Wine Cellar

Temp. Range : 5-18°C (Compressor System)
Exterior Door : Stainless Steel & Glass Door

- Holds 142-160 bottles
